

It's been just 10 weeks ...

Gerry Gallagher, e-Learning Co-ordinator

Dr. Moira Maguire, Head of Learning and Teaching

Dundalk Institute of Technology, Ireland

Three stages

1. Rapidly moving teaching and learning online
2. Designing alternative approaches to assessments
3. Learning from the experiences of students and teachers to plan for next year

Principles

Innovation in context

Shared values and goals

Local needs and constraints

Leverage strengths

Our approach

1. Devise good practice principles and guidelines
2. Focus on key areas
3. Build confidence – resources, workshops
4. Provide support and advice to groups/individuals at all levels
5. Act as advocates for both students and teachers

Some thoughts ...

- We can change rapidly when we need to
- We have a capacity for creativity and innovation driven by shared goal of student success
- Technology is only a small part of the jigsaw; pedagogy is what's most important
- Communication is a vital component
- Many may re-consider practice in learning and assessment design
